

XLH™ Hybrid Electric Upfit

The Chevy Silverado and GMC Sierra 2500 / 3500 HD trucks have set a high bar for power, performance and versatility for a wide range of applications. For the first time, these popular pickups can now be ordered as new or retrofit hybrid models, with an XLH hybrid electric drive system from XL Fleet.

Reduce Emissions and Improve Fuel Economy

For years, XL Fleet has partnered with General Motors to electrify some of GMC's and Chevy's most popular vans and cutaways, helping them achieve up to a 25% MPG improvement* and a 20% emissions reduction. Now, XL's market-leading hybrid system is ready to electrify the Silverado and Sierra 2500 / 3500 HD work trucks to give commercial and municipal fleets a proven way to meet sustainability goals without disrupting operations or performance.

Fleet-Ready™

XL hybrid systems install quickly and easily onto factory vehicles, so they're ready to work in your existing fleet with:

- no driver training
- no special fueling infrastructure
- no range concerns

The manufacturer powertrain and warranty remain completely intact, and our hybrid component warranty is 3 years / 75,000 miles.

Maintain Operational Requirements

Fleets have very specific requirements for their vehicles and there is no "one size fits all" electrification solution for all fleets and applications. XL Fleet's hybrid systems are built for a broad range of jobs and are ideal for fleets who don't yet have the budget or charging infrastructure to support all-electric options. Because the XLH system works in parallel with the OEM powertrain, the hybrid electric Silverado and Sierra perform as you expect them to, without range concerns.

| XL Hybrid Chevy Silverado GMC Sierra 2500 / 3500 HD | |
|---|------|
| Engine (gasoline) | 6.6L |
| Wheelbase | All |

Installation available for new vehicles and retrofits. Configuration and model year availability may vary. Contact your XL Fleet sales manager for details.

*Actual MPG may vary based on driver behavior, drive cycle and other factors.

XLH™ Hybrid Electric Drive System

Proven Performance Over 150 Million Miles

The XLH hybrid electric drive system has provided more than 150 million reliable, sustainable miles across a wide range of fleet vehicles. The hybrid system saves fuel through regenerative braking, a process by which the electric motor helps slow the vehicle during braking to charge the hybrid battery. As the driver accelerates, the hybrid battery releases the stored energy to the electric motor, which helps to propel the vehicle – reducing fuel consumption and lowering emissions.

| XLH™ Hybrid System | Specifications |
|---------------------------|--------------------------------|
| System Voltage | 259V |
| Battery | High Efficiency Lithium Ion |
| System Weight | 350 lbs |
| Electronic Speed Governor | Up to 75 MPH |
| System Torque (Peak) | 220 lb-ft (Added at Driveline) |
| Component Warranty | 3-Year / 75,000 Miles |

Intelligent Decisions

Our proprietary, cloud-based, vehicle connectivity platform provides actionable intelligence, including speed, idling, vehicle drive cycle and CO2 emissions reduction.

XL Fleet is a leading provider of a full suite of commercial and municipal fleet electrification solutions.
