

XLH™ Hybrid Electric Upfit

XL Fleet, the leader in connected fleet electrification solutions, gives the Ford F-59 commercial stripped chassis a hybrid electric upfit solution that improves fuel efficiency by up to 25%* and significantly decreases CO2 emissions. Our revolutionary XLH hybrid electric drive system seamlessly installs onto the Ford powertrain, transforming your F-59s into hybrid electric vehicles with better acceleration and regenerative braking.

Fleet-Ready™

XL hybrid systems install quickly and easily onto factory vehicles, so they're ready to work in your existing fleet with:

- no driver training
- no special fueling infrastructure
- no range concerns

The manufacturer powertrain and warranty remain completely intact, and our hybrid component warranty is 3 years / 75,000 miles.

*Actual MPG may vary based on driver behavior, drive cycle and other factors.

Maintain Operational Requirements

XL Fleet's hybrid systems are built for a broad range of jobs and are ideal for fleets who don't yet have the budget or charging infrastructure to support all-electric options. Because the XLH system works in parallel with the OEM powertrain, the hybrid electric Ford F-59 performs as you expect it to, without range concerns.

XL Hybrid Ford F-59 Commercial Stripped Chassis

Engine (gasoline)	7.3L
Wheelbase	All

Installation available for new vehicles and retrofits.

Configuration and model year availability may vary. Contact your XL Fleet sales manager for details.

XLH™ Hybrid Electric Drive System

Proven Performance Over 150 Million Miles

The XLH hybrid electric drive system has provided more than 150 million reliable, sustainable miles across a wide range of fleet vehicles. The hybrid system saves fuel through regenerative braking, a process by which the electric motor helps slow the vehicle during braking to charge the hybrid battery. As the driver accelerates, the hybrid battery releases the stored energy to the electric motor, which helps to propel the vehicle – reducing fuel consumption and lowering emissions.

XLH™ Hybrid System	Specifications
MPG Improvement*	Up to 25%
System Voltage	259V
Battery	Lithium Ion
System Weight	385 lbs
Electronic Speed Governor	Up to 85 MPH
System Torque (Peak)	220 lb-ft (Added at Driveline)
Component Warranty	3-Year / 75,000 Miles

*Actual MPG may vary based on driver behavior, drive cycle and other factors.

Intelligent Decisions

Our proprietary, cloud-based, vehicle connectivity platform provides actionable intelligence, including speed, idling, vehicle drive cycle and CO2 emissions reduction.

XL Fleet is a leading provider of a full suite of commercial and municipal fleet electrification solutions.
